

# The Rock Carvings of Morgan Shoal

This map shows the location of around 700 (out of 1,110) of the most interesting rock carvings along Morgan Shoal, from 47th Street to Hyde Park Boulevard.

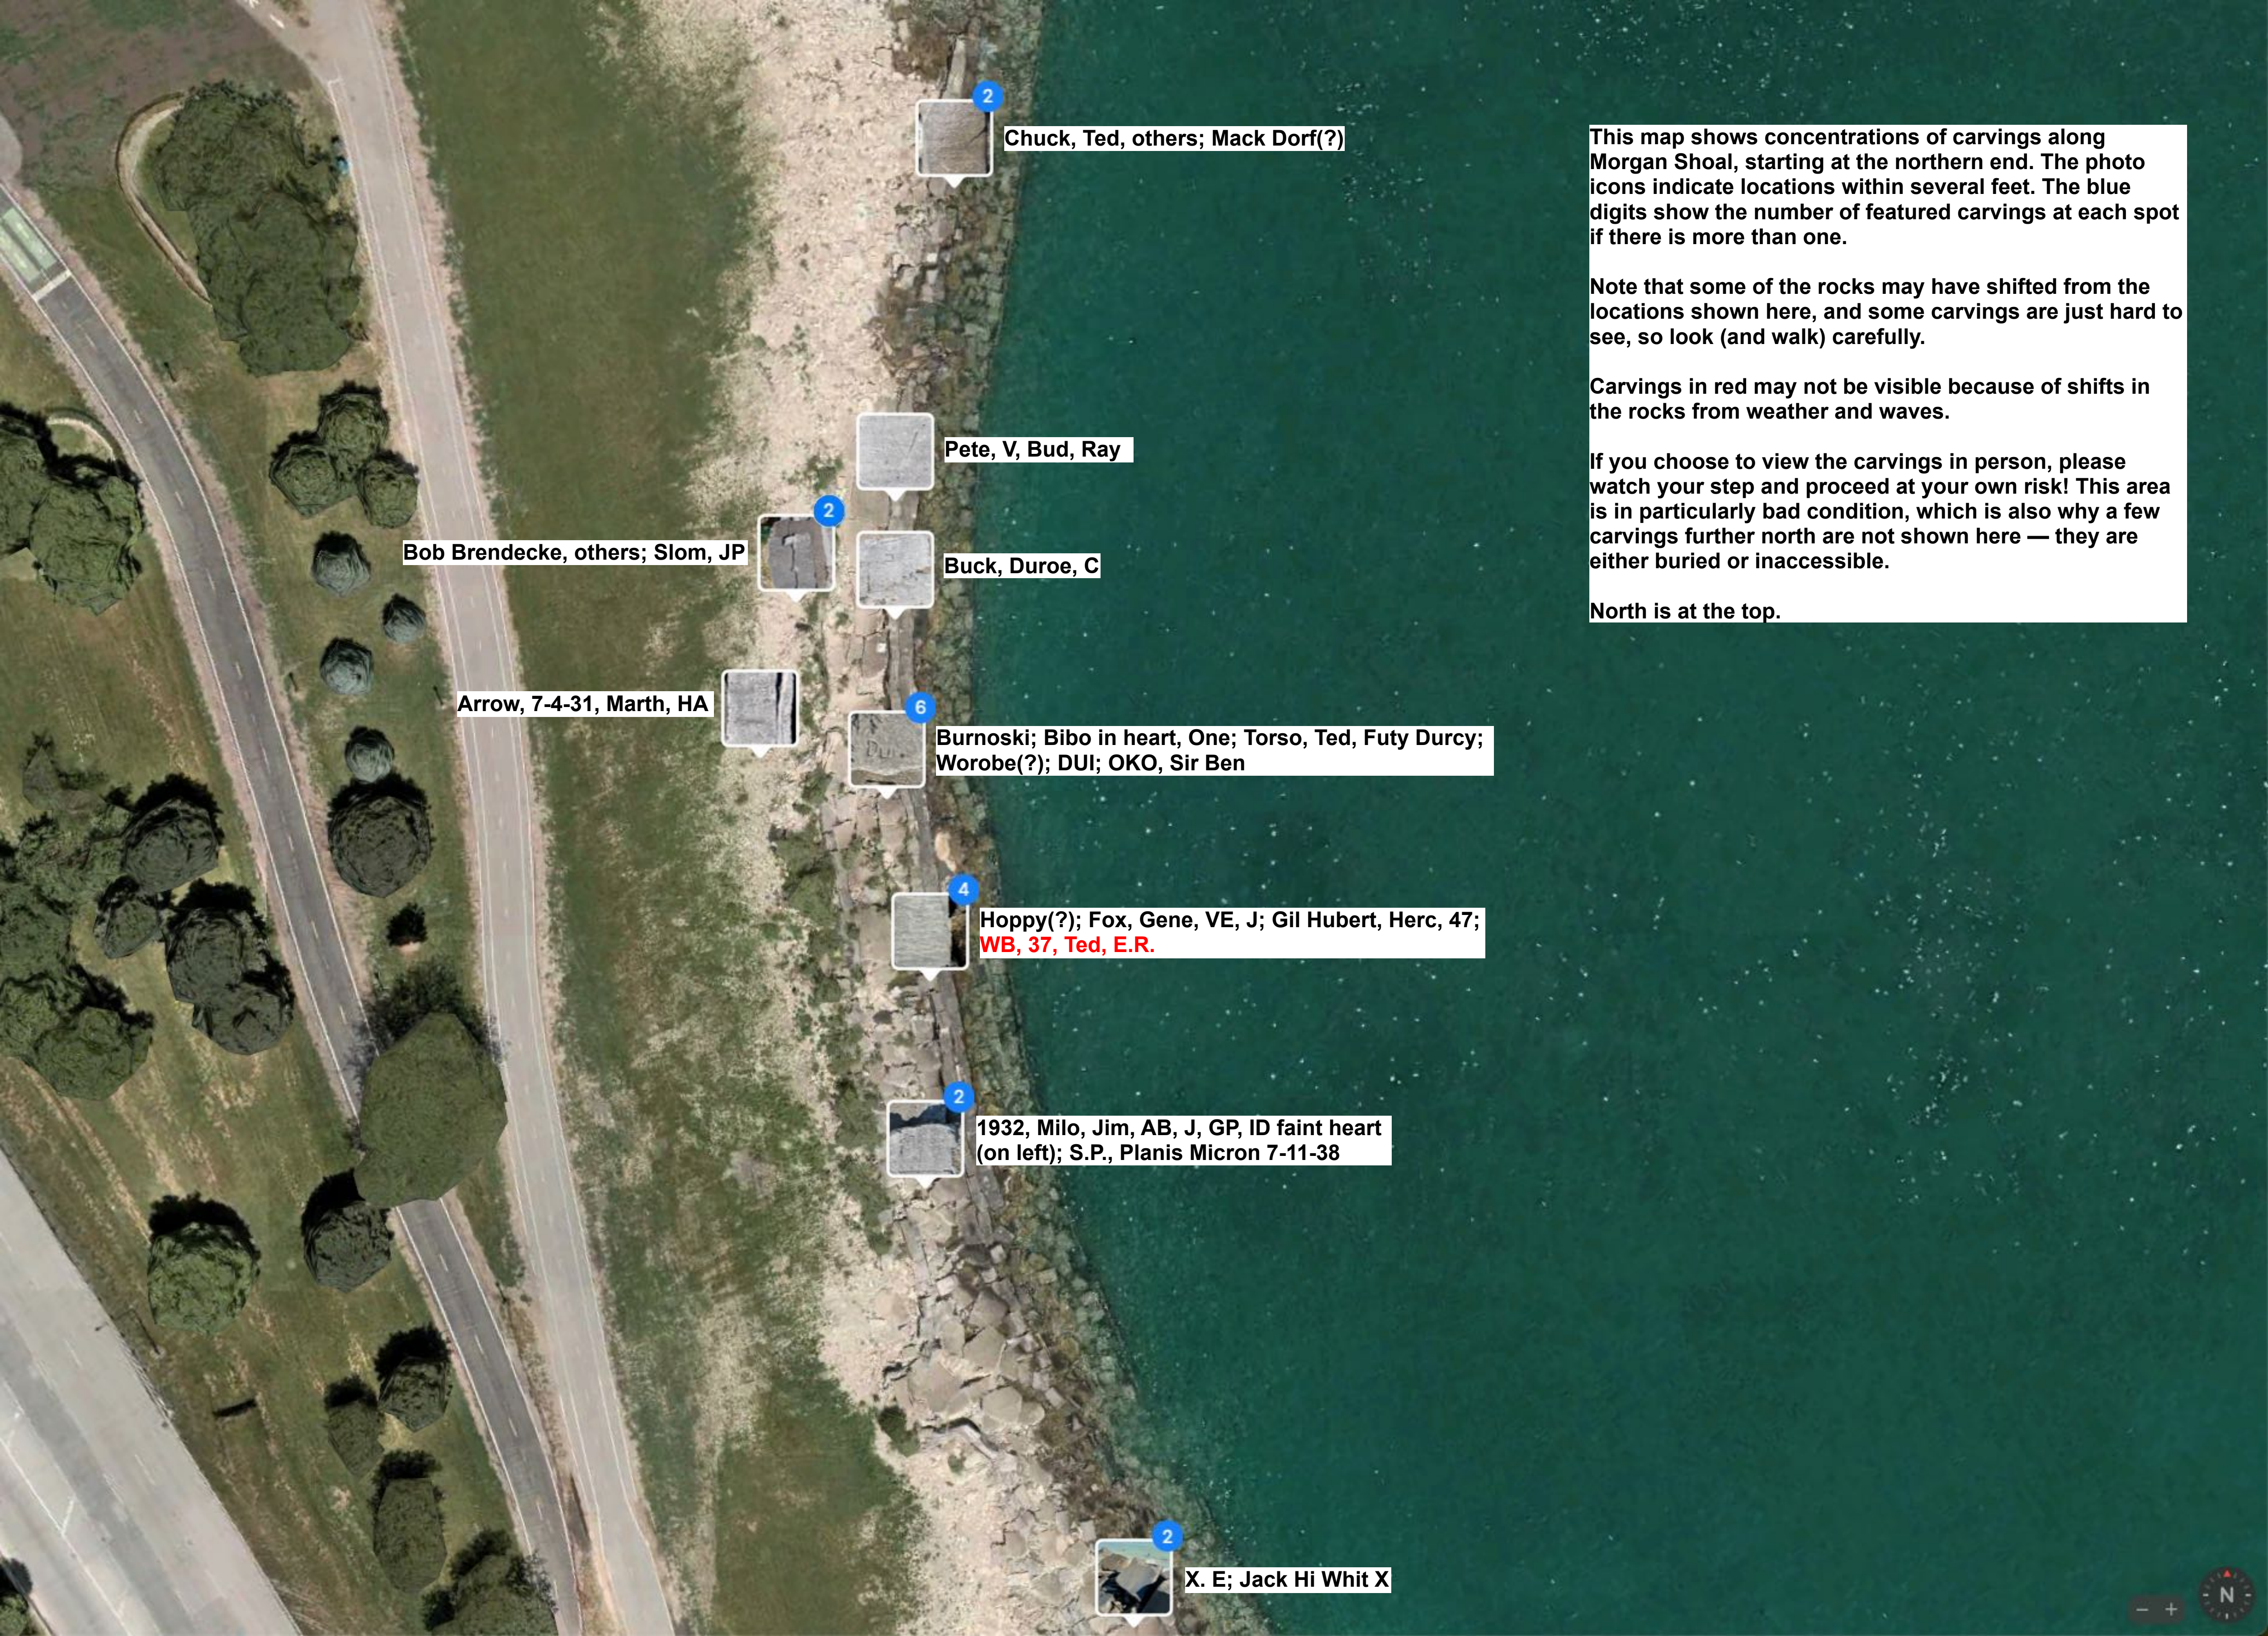

The photo icons indicate locations within several feet. On this page the blue digits show the approximate number of sculpture-bearing blocks at each spot. There are typically more carvings in a location than these numbers show since one block can host multiple carvings. On the following pages the blue digits indicate the number of featured carvings at each location.

Note that some of the rocks may have shifted from the locations shown here, and some carvings are just hard to see, so look (and walk) carefully.

Please keep in mind that this shoreline is badly deteriorated in many places, and in some areas virtually impassable. If you choose to view the carvings in person, please watch your step and proceed at your own risk! Or you can view an online gallery of these carvings at [interestingideas.com](http://interestingideas.com).

This map shows concentrations of carvings along Morgan Shoal, starting at the northern end. The photo icons indicate locations within several feet. The blue digits show the number of featured carvings at each spot if there is more than one.

Note that some of the rocks may have shifted from the locations shown here, and some carvings are just hard to see, so look (and walk) carefully.

Carvings in red may not be visible because of shifts in the rocks from weather and waves.

If you choose to view the carvings in person, please watch your step and proceed at your own risk! This area is in particularly bad condition, which is also why a few carvings further north are not shown here — they are either buried or inaccessible.

North is at the top.
